EDUCATION

The University of Cincinnati, College of Engineering and Applied Science

Master of Science in Computer Science

The University of Toledo, College of Engineering

Bachelor of Science in Computer Science and Engineering, Data Science Minor, Cumulative GPA: 3.90

PROFESSIONAL EXPERIENCE

Software Engineer – MES I | First Solar

February 2025 – May 2026

Worked with stakeholders to build and enhance software systems for manufacturing, reliability, and R&D processes.

- Integrated shop floor systems with custom-developed and off-the-shelf solutions.
- Assisted administrators (server admins, network admins, DB admins) in troubleshooting enterprise-level problems.
- Designed, coded, tested, and documented simple programs, and assisted in the implementation of software.
- Applied tools and methods to identify the user experience, characteristics and tasks, and the technical, organizational and physical environment in which the product or system will operate.

MES Software Engineer | Nysus Solutions

January 2022 – February 2025

Collaborate with 20+ members (PMs & Developers) to build and enhance custom web-based manufacturing software.

- Developed and integrated MES software with ERP systems (e.g., SAP, Oracle) and production equipment (e.g., PLCs, HMIs) to automate processes and improve information flow.
 - ⇒ Customers: DMS, IAC, TEAMS System, DNUS, Dana Toledo & Auburn Hills (virtual MES Stations), Yanfeng
- Supported transition management by migrating legacy systems and data to new MES platforms with minimal production disruption.
- Provided technical support and troubleshooted MES software issues to identify root causes and reduce downtime for more than 20 customers.
- Coordinated onsite implementation of MES software solutions, resolved 30+ technical issues and adapted solutions to customer engineering needs.
- Maintained and improved existing applications using MS SQL Server Management Studio.

DevOps Developer Internship | Equity Trust Company

May 2021 – September 2021

Collaborated in a team of 5 to unit test and optimize the current Account Open process for Equity Trust Company

- Maintained and modified existing APIs while maintaining documentation and testing standards.
- Performed unit testing on 5+ main functions in the company core process to verify customers' operations.
- Deployed 2 features to production after performing necessary modifications and unit testing.
- Contributed to the process of remodeling and increasing security level of the Customer Account Open Process by changing it from Service Bus Queue to Topics & Subscriptions from Azure Architecture.

Software Developer Co-op | Plastic Technologies Inc

January 2020 – May 2020

Cooperated with 4 members of the Simulation Department to develop algorithms and update internal custom website

- Updated and maintained customer website using .NET Framework, JavaScript, HTML, and MSSQL to improve day-to-day operations within the company, and innovation for future business.
- Developed mathematical methods and algorithms to draw graphs and calculate volume of plastic bottles and preforms.
- Assisted senior engineers with lab measurements and generated reports on simulation results of the product.

TECHNICAL SKILLS & CERTIFICATIONS

Programming Languages: Java, C#, C++, Assembly Language (80x86 & ARM)

Web Development: HTML5/CSS, JavaScript (Vanilla, jQuery), TypeScript, Angular, PHP, MySQL/MSSQL, ASP.NET Core

Others: Project Management, GIT, package manager (composer, NodeJS, nugget), docker, Unit Testing, Machine Learning

Data Science: Microsoft Excel, SPSS, SAS, Python, R

PROJECTS

myHome Website | Full Stack Developer

December 2022 – Present

Personal Property Management App

- Building RESTful APIs (using ASP.NET Framework) that serve data to the Angular/TypeScript front-end to visualize information of tenants and help to administrate personal property.
- Collaborating with 10+ tenants to identify practical issues and improve the efficiency of the website services.
